

we believe that K-LOVE has operated in the public's (our) interest! It appears that too many non-family oriented stations are on the airwaves today, especially all the hoopla over Stern's doings! It's amazing that I actually have to monitor the lyrics of songs on the 'POP' stations that I've also listened to, due to the words becoming more explicit with each 'new hit'. If K-LOVE were to be displaced, it would become another reason to completely convert over to MP3's and have more control over the music that's being pumped into our kid's ears! Red ribbons won't stop aids, good input and good music will! Thanks for the place to speak out.
